Description:

Product	Road bike stand parking floor two tier double layer bicycle rack
Material	Stainless/ Carbon Steel
Model No.	PV-0115-01
Size	2075mm*1970mm*1828mm or customized.
Color	Sliver,Black,White or customized.
N.W/G.W	92.7kg/101.97kg
Packing Details	1Set/Bubble wrap/Carton
Capacity	6 bikes
Surface Treatment	Galvanized/ Powder coated
Application	outdoor double deck bicycle rack
Sample Time	7-12days

Features and Advantages:

- **Double Layer Bicycle Rack** maximize vertical space by allowing you to store two bikes, one above the other, using the same footprint as a single bike. This is particularly beneficial when you

have limited floor space or need to store multiple bikes in a compact area.

- With a two-layer bike rack, you can store twice as many bikes compared to a single-layer rack. This is advantageous for households, bike shops, offices, or any other location where multiple bikes need to be stored in a limited space.
- Most **two tier bike racks** are designed with a user-friendly mechanism that allows you to easily load and unload bikes from both the upper and lower levels. This ensures convenient access to any bike in the rack without having to move other bikes out of the way.
- Two-layer bike racks typically incorporate secure locking systems or mechanisms to keep your bikes safe and prevent theft. Many racks have individual locking points for each bike, providing added security and peace of mind.
- By utilizing vertical space, a two-layer bike rack helps keep your storage area tidy and organized. Bikes are neatly stacked, creating a cleaner and more aesthetically pleasing environment compared to bikes scattered around or leaning against walls.
- Two-layer bike racks often come with padded or cushioned contact points to protect the bikes' frames and wheels from scratches or dents. This feature helps maintain the condition of your bikes over time.
- Two-layer bike racks can accommodate a variety of bike types, including different frame sizes, styles, and wheel diameters. Adjustable hooks or arms on the rack allow for customization and flexibility in storing various bike configurations.
- Many two-layer bike racks are designed for easy assembly and installation. They often come with clear instructions and the necessary hardware for mounting, allowing you to set up the rack quickly and hassle-free.

Warranty:

Quality Assure	* ISO approved
	* 1-year warranty
	* Rust-proof: 3-5 year for powder coated products and 10-15 years for galvanized products.
	* Stable orders for North America, Europe and Australia market.

FAQ:

1.Can you print our logo on the products?

-Yes, of course. Just give us your logo image and tell us your requirements, your logo will be perfectly shown on it.

2.Can we make our own design on the packaging?

-Sure, most of our clients are using their self-designed packaging.

3.If we can make some change to your products?

-Customization is welcomed! We are glad to assist you in making the products better and we will protect your design.

4.What's your lead time?

-Normally 7 working days for sample, 30 working days for mass production.
