Features & Benefits

A [bicycle parking bollard](#) is a device specifically designed for securing bicycles in public spaces. It consists of a sturdy post or bollard that is installed into the ground and features a horizontal bar or loop where cyclists can lock their bicycles. The bollard typically has a durable construction to withstand

attempted theft or vandalism. Bicycle parking bollards are commonly found in urban areas, parks, schools, and other locations where cyclists need a secure place to park their bikes. They help promote cycling as a mode of transportation by providing a convenient and safe parking solution for bicycles. Cyclists can lock their bikes to the bollard using a variety of locking mechanisms, such as U-locks or cable locks. These bollards often have a distinctive design or color to make them easily recognizable as bicycle parking facilities. Some bollards may also incorporate additional features, such as integrated lighting or signage, to enhance visibility and functionality.
