

Features:

- Cycle Parking system--bike rack is the proven solution where bicycle parking spaces are required.
- Designed for ease use and installation
- Offers an attractive and secure facility for indoor and outdoor use.
- Versatile,high density system that can be installed for single or double sides access for maximum space efficiency
- Available in different sizes,and 3 finishes galvanised,color and 316 stainless steel.
- Cycle Parking system--bike rackare fully welded for vandal resistance shipped as one piece with no assembly required, include all fixings,and are Guaranteed for 15 years!
- Curved design: The wave bike rack features a gently curved shape that allows bikes to be parked in a variety of positions along the length of the rack. This design provides ample space for multiple bikes to be parked securely without crowding.
- Durable construction: Wave bike racks are typically made from sturdy materials such as steel or aluminum, which can withstand the wear and tear of daily use and exposure to the elements.
- Space-saving: The curved design of the wave bike rack allows for more bikes to be parked in a smaller space than traditional bike racks. This makes it a great option for areas where space is limited.
- Secure bike storage: Most wave bike racks feature locking mechanisms that allow bikes to be secured in place with a U-lock or chain. This can help prevent theft and ensure that bikes remain securely parked until the owner returns.
- Versatility: Wave bike racks can accommodate a variety of bike styles and sizes, including road bikes, mountain bikes, and electric bikes. This makes them a versatile option for bike parking facilities in a range of settings, from urban centers to suburban neighborhoods.
- Accessibility: The curved shape of the wave bike rack makes it easy for riders to access their bikes

and park them in a variety of positions. This can be particularly helpful for cyclists with mobility issues or who are carrying large items on their bikes.

Description:

Model	PV-0070-01
