# Surface Treatment

**1. Galvanized (Carbon Steel)**  
Through galvanizing as an anti-rust measure, the Bike Racks can be protected from normal use for more than 5 years outdoors

**2. Powder Coating (Carbon Steel)**  
As a rust prevention measure by Power coating, it also has a beautiful appearance and protects the bike rack to be used outdoors for more than 5 years.

**3. Polish& Brush (Stainless Steel)**  
Stainless steel materials can effectively prevent corrosion and rust. Through polishing and brushing, the surface of the Bike rack is smoother and more beautiful.

**Note:** You can choose both Galvanized and powder coating together to make the bike rack stronger anti-rust.
