Surface Treatment

1. Galvanized (Carbon Steel)

Through galvanizing as an anti-rust measure, the Bike Racks can be protected from normal use for more than 5 years outdoors

2. Powder Coating (Carbon Steel)

As a rust prevention measure by Power coating, it also has a beautiful appearance and protects the bike rack to be used outdoors for more than 5 years.

3. Polish & Brush (Stainless Steel)

Stainless steel materials can effectively prevent corrosion and rust. Through polishing and brushing, the surface of the Bike rack is smoother and more beautiful.

Note: You can choose both Galvanized and powder coating together to make the bike rack stronger anti-rust.
