QUESTIONNAIRE

- [QUESTIONNAIRE](#) is a survey instrument used to collect data from a large number of respondents. It is a common method for gathering information about attitudes, behaviors, and opinions. The questionnaire is typically distributed to a sample of the population, and the responses are analyzed to draw conclusions about the population as a whole.
- The questionnaire is a self-administered survey instrument. It consists of a series of questions that are answered by the respondent. The questions can be open-ended or closed-ended. Open-ended questions allow the respondent to provide a detailed answer, while closed-ended questions provide a limited set of response options.
- The questionnaire is a common method for collecting data in a wide range of fields, including psychology, sociology, marketing, and health research. It is a cost-effective and efficient way to gather information from a large number of people.
- The questionnaire is a common method for collecting data in a wide range of fields, including psychology, sociology, marketing, and health research. It is a cost-effective and efficient way to gather information from a large number of people.
