

Description

A **Double Decker Bike Rack** is a type of bike rack that is designed to maximize the use of vertical space, allowing twice as many bicycles to be parked in the same footprint as a traditional bike rack. Double Decker Bike Racks consist of two levels of **bike rack outside**, with the upper level accessible by a ramp or staircase. The lower level of the Double Decker Bike Rack typically has a traditional horizontal design, with the bike frame resting on bars or loops. The upper level is often designed with a diagonal or vertical frame to allow the bikes to be stacked in a space-efficient manner.

Double Decker Bike Racks are commonly used in areas where space is limited, such as urban areas or public transportation hubs. They provide an efficient way to park a large number of bicycles in a small space, while still allowing cyclists to easily access and lock their bikes securely.

“Southern has introduced a double deck cycle rack for the first time at Sutton railway station. The new 2 Tier System holds 40 cycles in the same footprint as the old rack – doubling the amount of parking space s, is covered by a canopy to keep the worst of the rain off and is covered by 24-hour CCTV. Southern’s Project Manager, Paul Best said: “We are delighted with the new rack.

It’s innovative in its design and is well used by our cycling passengers and, as a result, we are now looking at more stations where this kind of facility would be of tremendous benefit to our passengers.” The new rack at Sutton was installed following comments from passengers, local authorities and user groups who contributed to the formation of Sutton’s Station Travel Plan. The plan looks at ways to encourage passengers to travel to and from the station in a more sustainable ways than the car, and ways in which overall public transport integration at the station can be enhanced. Southern has plans to extend the two-tier system to other stations on its network including Horsham and Haywards Heath.”

Now a new bike rack undisappear in our company .it is called [double-deck stacked bike rack](#).
