

Description

Product Name	Bicycle Accessories Stand up Aluminum New Type 2 in 1 Repair Stand Bike Stand
Material	steel
Size	35*180~300cm
Capacity	2-10 bikes(According to customer need)
Finish	hot-galvanized
Packing	Normal packing
MOQ	50pcs
OEM/ODM	offered

Features

A [bike repair stand](#) is a tool designed to hold a bicycle securely in place while you perform maintenance or repairs. It provides a stable platform that elevates the bike off the ground, making it easier to work on different components without straining your back or constantly bending over.

Here are some key features and considerations when looking for a bike repair stand:

- **Stability:** Look for a repair stand that offers a sturdy and stable base. It should be able to support the weight of your bike without wobbling or tipping over.
- **Adjustable height:** Choose a stand that allows you to adjust the height according to your preference and the type of work you need to perform. This feature ensures comfort and accessibility during repairs.
- **Clamp mechanism:** The clamp is what holds the bike in place on the stand. Look for a stand with a secure and reliable clamp that can accommodate various tube sizes without damaging the frame.
- **Portability:** If you plan to transport the stand frequently or have limited storage space, consider a portable and foldable option. Look for stands that are lightweight and easy to set up and pack away.
- **Durability:** Opt for a stand made from durable materials such as steel or aluminum. These materials provide strength and longevity, ensuring your stand will last through multiple repairs.
- **Rotational functionality:** Some repair stands have a rotating feature that allows you to turn the bike 360 degrees. This feature enables easier access to different parts of the bike without having to constantly reposition it.
- **Tool tray or storage:** Consider a stand that includes a tool tray or additional storage space. Having a designated area to keep your tools and small parts nearby can help streamline the repair process.
- **Price:** Set a budget based on your needs and frequency of bike repairs. There are options available at various price points, so you can find a suitable stand within your budget.

Remember to read customer reviews and ratings to get an idea of the stand's reliability, ease of use, and

overall quality. Additionally, check if the stand is compatible with your specific type of bike (e.g., road bike, mountain bike) to ensure a proper fit.

FAQ

1.Can you print our logo on the products?

- Yes, of course. Just give us your logo image and tell us your requirements, your logo will be perfectly shown on it.

2.Can we make our own design on the packaging?

- Sure, most of our clients are using their self-designed packaging.

3.If we can make some change to your products?

- Customization is welcomed! We are glad to assist you in making the products better and we will protect your design.

4.What's your lead time?

- Normally 7 working days for sample, 30 working days for mass production.
