Features & Benefits

A [wave bike parking rack](#), also known as a wave rack or serpentine rack, is a type of bicycle rack that is designed to accommodate multiple bicycles in a space-efficient manner. It consists of a series of curved bars arranged in a wave-like pattern, providing individual spaces for bicycles to be securely parked.

- Space efficient - it stores two bikes directly above each other
- Custom-made for specific sites
- Easy-to-use, safe and organized parking
- Individual racking - one bike per space
- German design and quality
- Patented gripping mechanism keeps the bike securely in place
- Freestanding design requires no anchors
- Easy assembly
- Deep wheel trays guide bike into rack
- Full-length wheel trays keep bikes upright
- Staggered bike positioning saves space and provides added clearance between bikes
- Modular design allows for easy expansion with multiple racks side by side
- Locking Stretch Rack includes solid steel lock rod
- Accepts cable locks and U-locks (locks not included)
