

Product Description:

Product Name	Outdoor Standard Steel Bike Floor Parking Rack Storage Solutions
Model No.	PV-0033-01
Material	Stainless Steel
Capacity	4 bikes
Application	Bike Front Back Rack Buckle for Outdoor bike parking
Packing Details	PE Foam+Carbon Box+Pallet
N.W/G.W	10.1KG/11.12KG
Dimension	106*50.8*44CM
Color	Black,Sliver
Surface Treatment	Powder Coated&Polish

Features:

A [Bike Floor Parking Rack](#) optimizes space, increases bike storage capacity, offers easy accessibility, enhances organization, and provides a secure and visually appealing solution for storing multiple bikes.High-low floor mount bike racks maximize the use of vertical space by utilizing a staggered or

tiered design. This allows you to store bikes at different heights, effectively using the vertical space and reducing the overall footprint required for storing multiple bikes. It is especially beneficial when you have limited floor space but want to store a larger number of bikes. By utilizing the vertical space, a [high-low bike rack](#) provides a higher bike storage capacity compared to single-level racks. The staggered design allows for more bikes to be stored in the same area, making it suitable for locations with a high volume of bike storage needs such as bike shops, apartment complexes, or commercial buildings.

- Custom-made for specific sites;
- Easy-to-use, safe and organized parking;
- Individual racking - one bike for space;
- German design and quality;
- Patented gripping mechanism keeps the bike securely in place;
- Mount up to 10 bikes with 5 secured above the other 5;
- Freestanding design requires no anchors;
- Easy assembly;
- Deep wheel trays guide bike into rack;
- Full-length wheel trays keep bikes upright;
- Staggered bike positioning saves space and provides added clearance between bikes;
- Modular design allows for easy expansion with multiple racks side by side;
- Locking stretch rack includes solid steel lock rod;
