

Video of the Bike Rack on Car

Features

A [bike rack on a car](#) is a device used to transport bicycles on the back, roof, or trunk of a car. The specific type of bike rack car that can be used on a car depends on the make and model of the car, as well as the type of bikes that will be transported. Bike rack on car from Chinabikerack is suitable for most bikes. Chinabikerack's car bike racks attach to the trailer hitch receiver on the back of a car and can carry 3 bikes. They are easy to install and remove, and provide a secure way to transport bikes.

- The **car bike rack 3 bikes** can hold three bicycles safely at the same time.
- It is put on the rear of the car. Every kind of car is suitable to install this bike carrier.
- The tie of **car bike rack** is made of TPE, which can prevent bicycles from scratch and is easy to adjust the length for different sizes's bicycles.
- Foam connection protector with the car to prevent the rigid connection.
- Easy installation and portable.
