Sampling time	7-12 days

Features of Outside Bike Racks:

1, [Outside bike racks](#) are designed with weather-resistant materials such as stainless steel, aluminum, or coated steel to withstand outdoor elements like rain, snow, and UV exposure. This

ensures durability and longevity, even in harsh climates.

2, Security features in bike racks can include built-in locking mechanisms, compatibility with bike locks, or design elements that make it difficult for thieves to tamper with or remove bikes. Some racks also offer options for securing both the frame and wheels of the bike.

3, [Outdoor Floor Bike racks](#) vary in their capacity to hold bikes, with some accommodating a single bike per rack and others designed for multiple bikes. Spacing between individual rack slots or bars is also important to ensure bikes can be parked without interfering with each other.

Details:
